EXPERIENCE

2020-10-01 To Still Now	**TRY SOLUTIONS LLC** I've been performing the role of a senior web developer in this company. Here I've designed and developed a magnificent number of templates, websites, software, advanced features, and web technologies.
2017-10-01 To 2020-04-26	**SKYNET BD** I had served as a lead developer in this company and I was responsible for the development and maintenance of their web applications & ISP software.
2016-07-01 To Still Now	**FREELANCER** I am also a professional freelancer in both online and local marketplaces. And have built, designed, and developed web apps, software, templates & websites. And also, have been hired for bug fixing and as a security expert.

PROJECTS

ISP Software	The software has been developed by me for my previous company (skynetbd) including a lot of advanced technologies, MicroTik connectivity, and accounting features.
Web-based Telephony system	I've developed multiple numbers of web-based telephony systems based on international platforms like Twilio, Signalwire.
Mapping and Scouting Application	This advanced type of application has been developed by me based on Google Map APIs, Google Spreadsheet API, and a dynamic data management system for map scouting and lead generations.
Real-time Communication Applications	I've sound experience & knowledge of building real-time chat, notifications, and audio-video calling applications with WebRTC, Pusher, Socket IO, Firebase, etc.
School Management Software and Virtual Classroom	I am well experienced in building and already developed virtual classrooms including complete features of school management software, online-based class management system, video-audio conference, screen sharing, whiteboard & attendance system with BigBlueButton.
Classified AD and Virtual marketplace	I've developed SEO friendly classified AD posting site and virtual marketplace with dynamic and secure backend applications for international clients.
Product Management and POS System	Multiple numbers of PMS and POS Systems have been developed by me with advanced & automatic accounting features, pay-slip & invoice generation.
Doctor Appointment Management System	This is an advanced project to manage doctor appointments with modern and advanced technologies like live chat and video calling.
Diagnostic Assistant Management System	This project has been developed by me to serve online-based diagnostic services by registering reputed diagnostic centers, hospitals, clinics. An authenticated client can search by zones to receive these services.
Voice-Based Mail-ling System	This web application is a voice-based e-mailing system for blind people and for the equality and betterment of society. This project is viewed on GitHub.
Secure Authentication Systems	Each of the projects mentioned above has the most secured authentication system which is designed and developed by me.
